

Campbell River Division of Family Practice – UBC Therapeutics Initiative

Journal Pub – Rational Prescribing & Deprescribing

Tuesday May 29, 2018 – Campbell River Maritime Museum
Wednesday May 30th, 2018 – Family Practice Rounds, Campbell River General Hospital

Facilitators: UBC TI Education Working Group

Thomas L. Perry MD, FRCPC
Aaron Tejani PharmD
Cait O'Sullivan, PharmD, BScPh, BA, Clinical Pharmacist
Dr Lorri Puil, MD PhD, UBC TI

AGENDA

Tuesday May 29th:

1730: Dinner/Socialize

1815: Introductions

18:30 Video Presentation

19:00 to 21:00 Brief presentations to challenge what we think we know about drug therapy:

- Inhaler combinations for COPD: what purposes, what evidence?
- What to expect from drugs for pain (tricyclics, gabapentin/pregabalin, duloxetine, venlafaxine)?
- Cyclobenzaprine and other drugs for back pain?
- Do antidepressants “work” for depression?
- Recognizing and resolving statin toxicity.
- How to think about surrogate markers when looking at evidence for drugs
- Rational Deprescribing – are you as prepared to STOP as to START drugs?
- Domperidone and its use in Canada for breast feeding augmentation

Wednesday May 30th:

07:30-08:30 **Tom Perry MD, FRCPC and Aaron Tejani PharmD**

- Do BP targets or glycemic targets in the elderly/frail/demented population make sense?

Mainpro Credits: 3.0
