WHO SHOULD ATTEND

- Family Physicians
- Nurses/Nurse Practitioners
- Pharmacists
- Allied Health Professionals
- Specialists

This popular conference provides physicians, pharmacists, nurses, and other health professionals with up-to-date, evidence-based, practical information on prescription drug therapy.

UBC Therapeutics Initiative faculty and internationally renowned guests will review best evidence for therapeutic issues important to primary care and specialty medicine.

Small group case-based workshops facilitate skill building for individual practitioners and for people working in interdisciplinary teams.

Comments from previous years:
“Wonderful speakers and first rate talks. Particularly enjoyed the honesty and scientific data about the drugs and the therapeutics.”

“Probably the most relevant and well presented presentations of any medical conference I’ve been to.”

“Practical pearls on evidence, guidelines and practice.”

Note that this conference is not supported by industry funding.
