

BEST EVIDENCE WEBINAR

Reflections on a prescribing portrait intended to help primary care prescribers reduce unnecessary opioid prescriptions for non-cancer pain

A webinar with Dr. Rita McCracken

Dr McCracken, Assistant Professor in the Department of Family Practice at UBC and member of the Therapeutics Initiative, will discuss:

- Definitions of “opioid-naïve” and “opioid sparing”;
- Quality of evidence for the efficacy of opioid analgesic use for non-cancer pain and addiction risk prediction tools;
- Potential barriers to audit and feedback tools regarding safe prescribing of opioids, in light of the toxic drug supply.

Audience: Clinicians, policy makers, and the general public

**Wednesday
May 18, 2022**

12:00–13:00 (Pacific)
