

METHODS SPEAKER SERIES

# Keep a human in the machine and other lessons learned from deploying and maintaining *Colandr*

## A webinar with Dr. Samantha Cheng

Dr. Cheng, Director of Conservation Evidence at the World Wildlife Fund will discuss:

- Colandr, an open-source web-based platform for conducting evidence syntheses and reviews which helps find the proverbial “needles” in a haystack.
- How Colandr can improve efficiency for syntheses in multidisciplinary topics, using nature-based conservation as a case study.
- Opportunities and challenges of developing an open source machine learning platform.

**Audience: Clinicians, policy makers, students, researchers, and the general public.**

**Wednesday**

**June 29, 2022**

**12:00–13:00 (Pacific)**
