

Methods Speaker Series

Research synthesis is older than you think.

Some early pioneers of meta-analysis

Wednesday, March 27, 2024 12:00-13:00 PDT

In this webinar, Prof. Stephen Senn will give an overview of the history of research synthesis from its roots in the 18th century and early 19th century in the science of astronomy to its subsequent application to agriculture and later in medicine in the 20th century, highlighting the contributions of some early pioneers, speculating why we overlook the origins of meta-analysis, and concluding with a call for greater interdisciplinary awareness that would be valuable to mankind.

Prof. Stephen Senn

PhD, FRSE, CStat

Consultant Statistician
