

Methods Speaker Series

Text Mining Systematic Reviews:

New Directions for Qualitative Research Synthesis

Wednesday, July 31, 2024 12:00-13:00 PDT

In this webinar, Dr. Caspar J. Van Lissa will discuss pioneering work on Text Mining Systematic Reviews (TMSR) by presenting two studies that used different TMSR pipelines to extract a latent nomological network from the literature in a particular subfield, and will reflect on general considerations regarding the use of text mining in research synthesis, based on his experience as Associate Editor of Research Synthesis Methods.

Dr. Caspar J. Van Lissa

Associate Professor of Social Data Science,
Department of Methodology & Statistics,
Chair of the Open Science Community Tilburg,
Tilburg University, Netherlands
