Pharmacist-led deprescribing of tramadol in long-term care

Wednesday, November 6, 2024 @ 12:00-1:00PM PST

Hafeez Dossa will describe his experience with a pharmacist-led intervention in a long-term care setting, which can dramatically reduce the inappropriate use of medications.

Bottom line: while making changes that improve or don't affect patient outcomes, deprescribing can also reduce drug costs, pharmacy dispensing, and nursing workload.

Hafeez Dossa, BSc
Pharmacy Manager, Care Rx,
Parksville, BC
