

Methods Speaker Series

Introduction to a new risk of bias tool for network meta-analysis

Wednesday, November 27, 2024 12:00-13:00 PST

In this webinar, Dr. Carole Lunny will describe a new risk of bias tool for network meta-analysis, developed using rigorous evidence based methodology including piloting and refinement. She will present examples to illustrate each item in the tool and will demonstrate how the tool will allow objective rating of the risk of bias in a network meta-analysis.

Dr. Carole Lunny, PhD

Researcher, Li Ka Shing

Knowledge Institute, Toronto
and Therapeutics Initiative, UBC
