

## Best Evidence Webinar

### The good, the bad and the ugly - rational PPI choices

Wednesday, March 11, 2026 @ 12:00-1:00PM PDT

In this TI Best Evidence Webinar, Dr. Aaron Tejani will present evidence supporting rational choice of proton pump inhibitors (PPI) by reviewing head-to-head RCTs and critically examining manufacturer claims. BC family physicians and nurse practitioners can learn how to optimize their prescribing of PPIs by using their personal Prescribing Portrait. Dr. Tejani will also include evidence comparing the use of PPI racemic mixtures vs enantiomers, such as omeprazole vs esomeprazole and lansoprazole vs dexlansoprazole.

Aaron M Tejani BSc (Pharm), PharmD  
Chair, Education Working Group  
Therapeutics Initiative  
University of British Columbia
