

## Best Evidence Webinar

### Treating pain is harder than it looks

Wednesday, April 22, 2026 @ 11:45AM-1:00PM PDT

This is an encore presentation delivered by Dr. David Juurlink, general internist and clinical pharmacologist/toxicologist at Sunnybrook Health Sciences Centre and the Hospital for Sick Children in Toronto. This presentation frames the treatment of pain as an experiment on the patient, and details how this experiment can be upended by common misconceptions about analgesics and by occult harms, particularly with NSAIDs and opioids. The 45-min presentation will be followed by a 30-min interactive questions & answers session.

David Juurlink MD PhD  
Professor, University of Toronto  
Senior Scientist, Institute for  
Clinical Evaluative Sciences
